

CAS Conference Synthetic Biology II – List of Posters

(Alphabetical Order of Presenters)

Poster 1

Ahmed Al-Mamari, Maurice Gallagher

Towards Bio-Contained Synthetic Organisms for Safe Real-Life applications

Poster 2

Julia Bartels, Jara Radeck, Tamara Cikovic, Franziska Dürr, Jennifer Emenegger, Korinna Kraft, Simon Kelterborn, Thorsten Mascher

Sporobeads: the Utilization of *Bacillus subtilis* Endospores for Protein Display

Poster 3

Robert Bradley, Martin Buck, Baojun Wang

Construction of a Biological Computing Circuit that Performs Full Binary Addition

Poster 4

Aurore Dupin, Friedrich C. Simmel

Biochemical Circuits in Cell-Sized Microcompartments

Poster 5

Evgeniia V Edeleva, Therese Dau, Susanne Seidel, Dieter Braun

Thermophoresis for Diagnostics of alpha 1-Antitrypsin Deficiency

Poster 6

Marco Mauri, Jara Radeck, Thorsten Mascher, Susanne Gebhard, **Georg Fritz**

Reverse Engineering and Forward Design of Antibiotic Resistance Modules

Poster 7

L. Bandiera, A. Pasini, M. Cortesi, E. Giordano, **Simone Furini**

Reducing Phenotypic Variability in Synthetic Biology

Applications Via Post-Transcriptional Control of Noise in Gene Expression

Poster 8

Tobias Härtel

CdvABC Mediated Cell Division in *Sulfolobus acidocaldarius*

Poster 9

Melanie Heinrich, Silke Oesterheld, Claudia Bauer, Michael Liss, Axel Trefzer

GeneArt Strings™ DNA Fragments - the Fast and Economic Way of Gene Synthesis

Poster 10

Jonas Helma, Dominik Schumacher, Christian Hackenberger, Heinrich Leonhardt

Repurposing Tubulin Tyrosine Ligase for Versatile and Efficient Site-Specific Protein Functionalization

Poster 11

Melanie Horlacher, A. Zeidler, D. Aschenbrenner, C. Mauser, A. Lochner, A. Romig, L. Reim, A. Mönch, F. Notka, T. Poehmerer, A. Trefzer
Improvement of DNA Synthesis

Poster 12

Stephan Fath, Asli Petra Bauer, Michael Liss, Anna Pils! Kristina Kliche, Katrin Wagner, **Ruth Kapzan**, Tatjana Smarschevski, Axel Trefzer, Ralf Wagner
From Gene to Protein—Extending Gene Synthesis to Reliable Protein Expression

Poster 13

Marion Kirchner, Sabine Schneider
Establishing a Selection Method to Identify Riboswitch Activators in *Bacillus Subtilis*

Poster 14

Kristina Kliche, Michael Liss, Katrin Wagner, Tatjana Smarschevski, Claudia Chiocchini, Lisa Ludewig, Axel Trefzer
GeneArt® Strings™ DNA Fragments to Protein - the Fast and Economic Way of Expression

Poster 15

Simon Kretschmer, Katja Zieske, Petra Schwille
Engineering a Pattern-Forming Protein System

Poster 16

Mickaël Lelimosin, Joao Ribeiro, Julie Arnaud, Aymeric Audfray and Anne Imberty
Engineering Lectins for Synthetic Glycobiology

Poster 17

Michael Liss, Daniela Daubert, Kathrin Brunner, Kristina Kliche, Ulrich Hammes, Andreas Leiherer, Ralf Wagner, Axel Trefzer
Embedding Watermarks in Synthetic Genes

Poster 18

Maria Lluch-Senar, Jonathan Karr, Alain Blanchard, Carole Lartigue, Pascal Sirand-Pugnet, Jörg Stülke, Luis Serrano
ERASynBio 2: MiniCell-A Mondel-Driven Approach to Minimal Cell Engineering for Medical Therapy

Poster 19

Anke Becker, Mark Buttner, Georg Fritz, Carol A. Gross, Calin C. Guet, **Thorsten Mascher**
ERASynBio 2: ECFexpress – an Orthogonal, Organism-Independent
Expression Platform Based on ExtraCytoplasmic Function (ECF) Sigma Factors

Poster 20

Christof Mast, Matthias Morasch, Emil Agerschou, Dieter Braun
A Selective Synthesis of Prebiotic Translation

Poster 21

Lukas Milles, Wolfgang Ott, Markus A. Jobst, Ellis Durner, Klara H. Malinowska, Constantin Schöler, Tobias Verdorfer, Michael A. Nash, Hermann E. Gaub
Force and Function of the Versatile Cohesin-Dockerin Interaction

Poster 22

Thorsten Müller, Mathias Enderle, Aymelt Itzen, Kathrin Lang
Proximity Enhanced Reactions as a Tool to Stabilize Low Affinity Complexes

Poster 23

Nikolai Netuschil, Silke Oesterheld, Claudia Bauer, Tobias Santl, Norbert Greifenegger, Christian Kranz, Michael Liss, Axel Trefzer
GeneArt Strings DNA Libraries - the Fast and Economic Way of DNA Library Production

Poster 24

Yvonne Nygård, Carsten Pohl, Annarita Viggiano, Jan A.K.W. Kiel, Arnold J.M. Driessen, Roel A.L. Bovenberg
Refining the Toolbox for Genetic Engineering of *Penicillium Chrysogenum*

Poster 25

Wolfgang Ott, Marcus Otten, Markus A. Jobst, Lukas F. Milles, Tobias Verdorfer Diana A. Pippig, Michael A. Nash, Hermann E. Gaub
From Genes to Protein Mechanics on a Chip

Poster 26

Daniela Pinto, Franziska Dürr, Qiang Liu, Thorsten Mascher
Optimization of an Extracytoplasmic Function Sigma Factor Based Switch

Poster 27

Philipp Popp, Mona Dotzler, Jara Radeck, Julia Bartels, Thorsten Mascher
The *Bacillus* BioBrick Box 2.0: Generation and Evaluation of New Essential Genetic Building Blocks for Standardized Work with *Bacillus subtilis*

Poster 28

Jara Radeck, Thorsten Mascher
Adapting the SEVA-Standard for the Needs of *Bacillus Subtilis* Vectors with Exchangeable Integration Sites

Poster 29

Hari Raj Singh, Markus Hassler, Sebastien Huet, Gyula Timinszky, Andreas Ladurner
DNA Damage Activates the Human Chromatin Remodeler ALC1 through ADP-Ribosylation

Poster 30

Johanna Roßmanith, Franz Narberhaus
Characterization of Synthetic RNA Modules Consisting of Riboswitches and RNA Thermometers

Poster 31

Friederike S. Rossmann, Felipe Romero-Saavedra, Tomas Racek, Antoni P.A. Hendrickx, Dominique Wobser, Johannes Huebner
Differential Regulation of Virulence Mechanisms Through Autoinducer 2 in *E. faecalis* Infections

Poster 32

Suvi Santala, Tommi Aho, Ville Santala
Improving the Robustness of Synthetic Biology Circuits

Poster 33

Dominik Schmieden, Anne Meyer, Marie-Eve Aubin-Tam
Using Bacteria to Make Improved, Nacre-Inspired Materials

Poster 34

Matthaeus Schwarz-Schilling, Fabio Chizzolini, Andrea Mückl, Sheref Mansy, Friedrich C. Simmel
Cell-Free Production and Assembly of a Multifunctional RNA-Protein Hybrid Structure

Poster 35

Sascha Serdjukow, María Tomás-Gamasa, Meng Su, Markus Müller, Thomas Carell
Enzymatic Incorporation of a Reversible Covalent DNA Crosslink

Poster 36

Andrea Mückl, Matthaeus Schwarz-Schilling, Katrin Fischer, Barbara Francz, **Friedrich C. Simmel**
EraSynBio2: UNACS - A unified nucleic acid computation system for organisms

Poster 37

Daniel Schindler, **Theodor Sperlea**, Torsten Waldminghaus
Synthetic Secondary Chromosomes in Bacteria to Study Chromosome Maintenance Systems

Poster 38

Wolfram Volkwein, Bastien Viverge, Andreas Reichert, Arne Skerra, Thomas Carell, Jürgen Lassak, Kirsten Jung
Synthetic Activation of Translation Elongation Factor P

Poster 39

Sebastian Wolf, Katharina Pflueger-Grau, Katja Bettenbrock, Andreas Kremling
Synthetic Toggle-Switch as a Biotechnological Approach
